Allocating health outcomes to risk factors, part 2

August 19, 2019
By Austin Frakt

Racial identity and the health system

I wrote about Nia, a young woman with diabetes, last week. She recently lost her job and her health care. This second of the series covers another aspect of her story. Why does health care vary so much between race and ethnicity?

Next Phase for the Drivers of Health Project

The next public meeting of the Drivers of Health project will be held in Detroit on September 11. Housing, education, and access and quality of health care will be the focus. Why? This post explains.

Big Data Has Potential to Drive Big Decisions

In late June, Public Agenda published a report on perspectives of low-income families on why social isolation, poverty & low health literacy matter.

Health system cost-effectiveness

Health care spending and outcomes

Does high rent affect health care spending and outcomes?
CONNECT THE FACTORS THAT YOU THINK MAKE US HEALTHY

INDIRECT FACTORS
- Government/Policy
- Income/Wealth
- Education
- Racial Identity
- Gender Identity

DIRECT FACTORS
- Environmental
  - Air Quality
  - Water Quality
  - Healthy Food
  - Housing
  - Schools
  - Roads
  - Household Structure
- Social Circumstances
  - Social Support & Isolation
  - Functional Status
- Health Behaviors
  - Diet
  - Smoking
  - Drug Use
  - Sleep
  - Exercise
  - Alcohol
  - Genetics
  - Sex
  - Prejudice

HEALTH OUTCOMES
- Age-adjusted Mortality
- Functional Status
- Life Expectancy
- Quality of Life/Wellbeing
